

Google DV360 API and Access Integration

Before starting you should define the email you need to send the invite to, all invitations are sent to corresponding agency-country email.

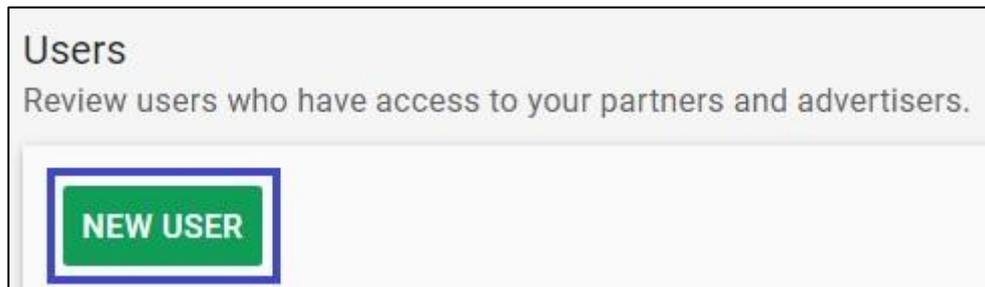

Ex: For PHD Denmark account(s), invitation is sent to phd-dk@annalect-data.info

To be able to access the data to be extracted, an initial once per account setup needs to be handled. To be able to do that in Display & Video 360, it is important to follow the below steps.

1. Log in to DV360 with the user that has Admin rights at:
<https://displayvideo.google.com/>
2. On the top right, click on **User Management and Notification Settings**, then from the popup, click on **User Management**

3. Click on New User on the left side

4. Add the email address (<agency>-<country>@annalect-data.info), mentioned at the beginning of the guide and select the Type **Partner & Advertiser**

Name	<input type="text" value="Annalect Nordics"/>
Email	<input type="text" value="<name>@annalect-data.info"/>
Type	<input type="text" value="Partner & advertiser"/>

5. Afterwards go to [Campaign Mapping](#), locate and select the client to onboard.
6. A prerequisite for a successful onboard, is that the steps above are done.

7. Choose 'Data Sources'
8. Find the 'Google Display and Video' data source and click onboard.
9. Enter Partner id and click 'Request Onboard'.
10. If everything is done correctly, a success message would show up.
11. If all steps are done correctly and you still receive an Error message, then contact Solutions on DK.Support@annalect.com
