

Pinterest API and Access Integration

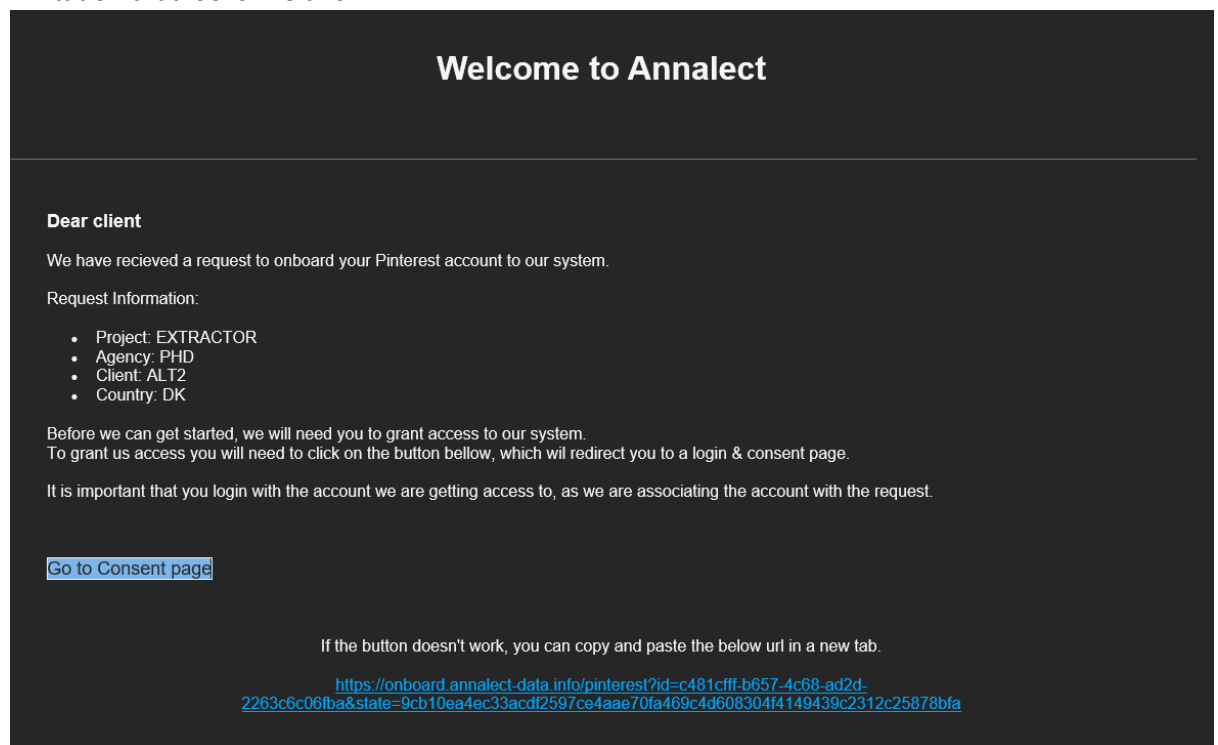

Pinterest onboard can be done through Campaign Mapping:

All Pinterest onboard through Campaign Mapping is for a single ad account, if an agency onboard is required i.e. Meaning all ad accounts belonging to the Main account, contact Annalect Solutions for further help on DK.Support@annalect.com

Follow the steps below, to grant access:

1. Navigate to [Campaign Mapping](#)
2. Locate and select the client you want to onboard.
3. Choose 'Data Sources'.
4. Find the 'Pinterest' data source and click the onboard button.
5. In the 'Email' field, enter the email address of the person who will receive the invitation. (important! The email should be directed to the one granting the access, not DK.Support@annalect.com)

Within a couple of minutes, the email address entered in the previous step will receive an invitation that looks like this.

6. Review the request information. If everything is in order, click the button or copy and paste the link into your browser.
7. You will be redirected to the LinkedIn login and consent page. After granting consent, you will be redirected to select an ad account from the available accounts.

One last step before we are ready.

Please pick one AdAccount you would like us to use.
