TikTok API and Access Integration

To be able to access and extract the data, an initial, once per account, setup needs to be handled.

To grant us access you need to do two things. First add our Ad Account as a member in your TikTok Business Center account and secondly give the added member the permission of "**Analyst**".

Follow the steps below, to grant access:

Adding an Ad Account to your TikTok Business Center

- 1. First open up your TikTok Business Center and click the Members section, located in the panel of the left.
- 2. Click Invite Member
- 3. Enter '<u>data_extract@annalect-data.info</u>' and select standard Access.
- 4. Click Next
- 5. Click Skip or Confirm and your invitation will be sent.

Adding the right permission level to the newly added Ad Account and giving permission to your Ad Account

The next step is now to assign the right permissions to the member and giving access to your Ad Account

1. Go to your Business Center and click **Members** on the navigation bar on the left.

- 2. Select the member you want to assign ad accounts to.
- 3. Click the Assign Asset button.
- 4. All your ad accounts will be displayed on the left and the permissions displayed on the right. Select the ad account you wish to assign and then select the permission level. Permission level should be **Analyst**
- 5. Click Assign Asset

TikTok: Business Center			BC Demot (Regular) ~	English 🧈 💿 🚍

- 6. Once you added the account and it's available you can navigate to https://campaignmapping.annalect.com/.
- 7. Select the country and then choose which client it is. When you clicked on the client you then click on Data Sources which is located under Client Info tab.

Campaign Mapping	Clients	Guide	Mapper Excluder Guide	Datasource Onboard Guide	Changelogs	
Client Info						
Client Code	C07	0		Client Name	365discount	Parent Code
